

Save the dates: 22nd & 23rd October, Geneva

Join the CEWASTE project for two events:

Stakeholder consultation: 1st Draft of the CEWASTE voluntary certification scheme for waste treatment

22nd October // 13:30-14:00 // Centre International de Conférences Genève

This is a free event and open to all. To register please complete the form [here](#).

REGISTRATION CLOSED

Workshop as part of WRF 2019: Voluntary certification scheme for CRM recycling (CEWASTE project) - overview & discussion

23rd October // 16:00-18:00 // Centre International de Conférences Genève

This event takes place as part of WRF 2019 and is open to delegates only – [further info](#). To register for WRF 2019 please visit the [conference website](#).

The CEWASTE project consortium is pleased to announce that the key components of the first draft of the CEWASTE voluntary certification scheme are now almost ready for discussion. In order to ensure broad acceptance of the essentials of this scheme through transparent process and to allow contribution from a wide range of stakeholders, we have organised a stakeholder consultation meeting and a workshop at which this initial draft will be discussed.

The project has now entered its 11th month of operation and we have taken great strides in the development of the voluntary certification scheme. So far, the project has identified 14 types of key CRM containing equipment (KCEs) from WEEE, batteries contained in WEEE, and ELVs that it will focus on. In addition, it has screened over 60 normative requirements such as legislation, standards and their certification schemes applicable to these KCEs that could be referenced and used for the CRM recycling certification scheme. A gap and obstacle analysis has also been conducted to identify which requirements need to be developed specifically for the CEWASTE certification scheme and which are mainly technical requirements.

We welcome all relevant stakeholders to contribute to the meetings. The consultation meeting on the 22nd will allow for more in depth discussion and feedback while the session at WRF 2019 on the 23rd will be shorter and more focussed on dissemination, presentations from stakeholders and reaching out to the WRF audience.
